It is the policy of PPPL that Asbestos and Asbestos Containing Materials (ACM) which are in good condition shall be left in place and protected from damage as much as practical. Asbestos and ACM shall be removed only when they pose a hazard to human health and/or the environment. In addition, Asbestos and ACM shall be removed in support of renovation and new construction projects.

The Environmental Services Division (ESD) has the responsibility and the authority for managing Asbestos and ACM at PPPL. This authority has been granted in order to control unsatisfactory work activities, to control further processing, delivery, installation, renovation, demolition, removal, and disposal of ACM, and to ensure that work is performed in compliance with all state and federal laws and regulations. The responsibilities and tasks surrounding Asbestos projects are defined in procedure EWM-005. Adherence to this policy will ensure PPPL compliance with NESHAP, OSHA, and New Jersey Departments of Health and Labor regulations.
