

Subject: Energy Management	Effective Date: Sept. 20, 2013	Initiated by: Associate Director, Engineering and Infrastructure
	Supersedes: NEW	Approved: Director

Policy

To support our mission needs, vision and strategic objectives, it is PPPL's policy to efficiently manage and reduce energy consumption in a manner that is consistent with energy legislation requirements and that is needed for an optimal work environment. By the efficient management of energy in the accomplishment of our mission and project goals in a safe and environmentally responsible manner, PPPL intends to minimize:

- Energy use,
- Energy costs,
- Adverse environmental impact of harmful emissions,
- Depletion of non renewable resources.

This policy applies to all PPPL employees, contractors, and students. Everyone is expected to comply with this policy and adhere to PPPL Energy Conservation Measures as set forth in the PPPL Energy Management Plan.
